SYSTEM WALKTHROUGH DECK

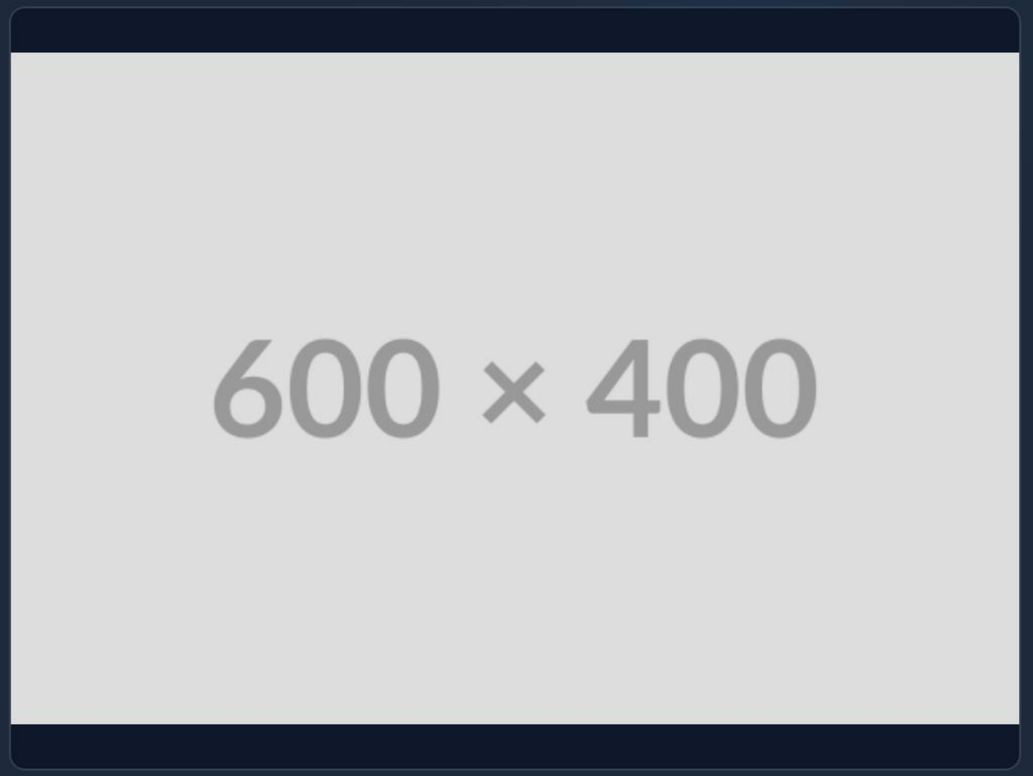

Radiant 4M System

Page Overview & Visual Workflow Guide

Page Overview: Login Portal

Authentication Page

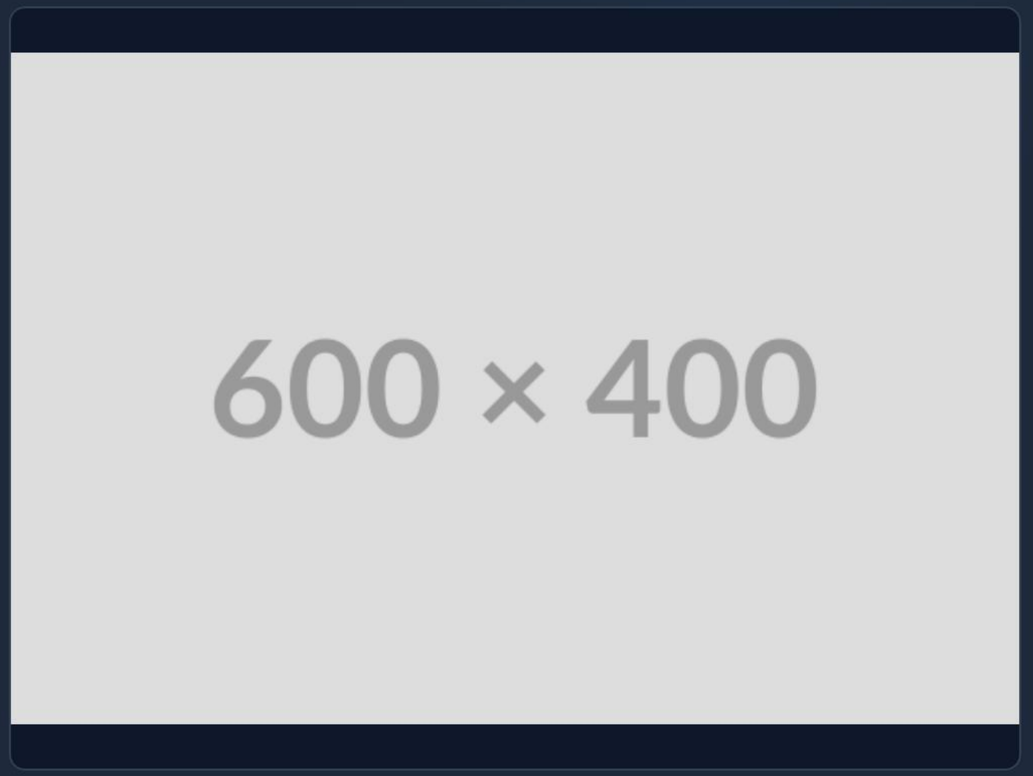

- Serves as the secure entry point for all suppliers and system administrators.
- Features credential validation alongside automated email OTP verification for privileged roles.
- Provides built-in links for account recovery and password management.

Page Overview: 4M Change Submission

Change Declaration Page

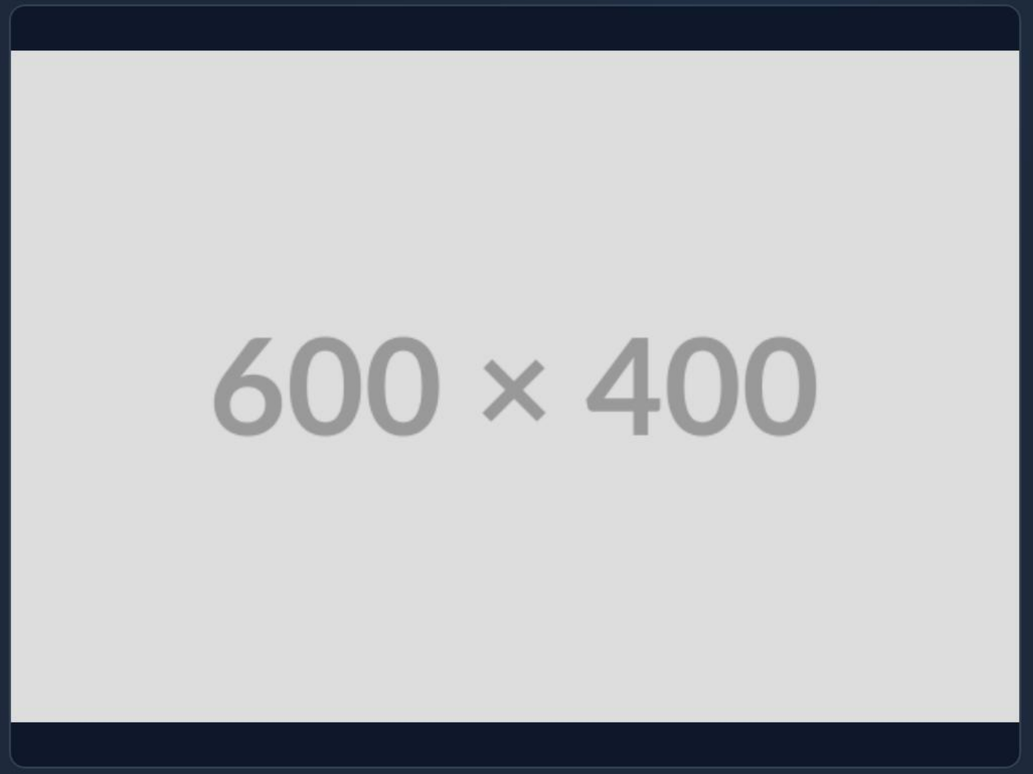

- Allows suppliers to submit formal change declarations categorized by Man, Machine, Method, and Material.
- Displays active monthly compliance score indicators to alert users of potential penalties.
- Includes integrated resource tools for downloading official reporting templates.

Page Overview: Submission History & Logs

Audit Log & Record Page

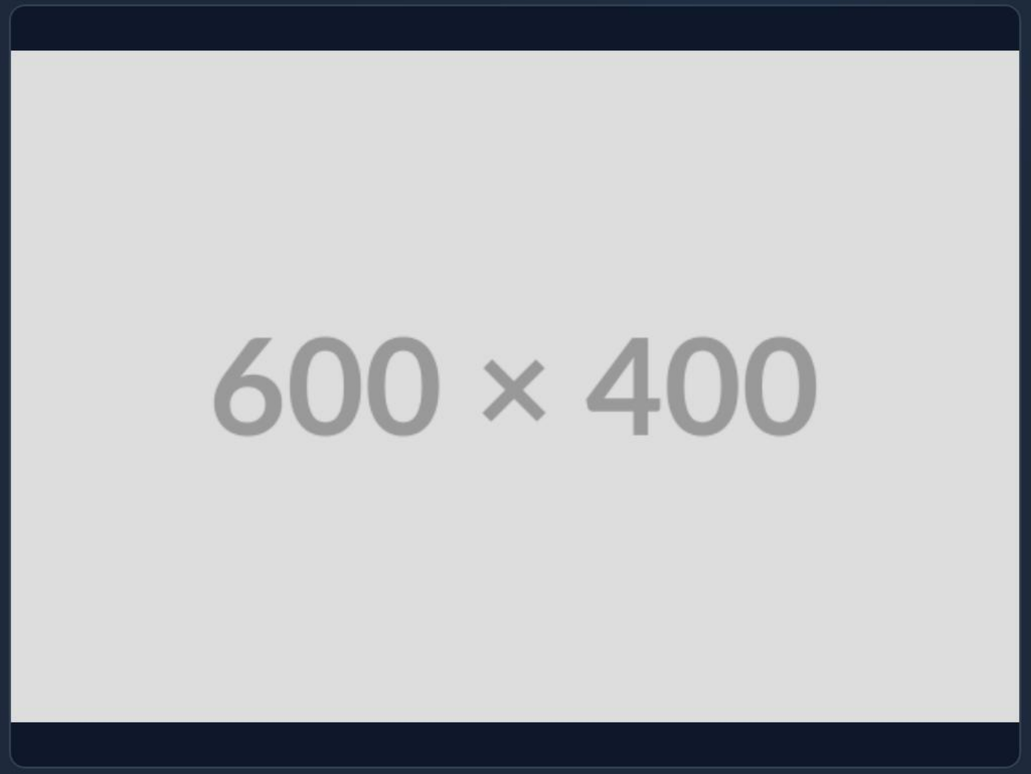

- Provides a comprehensive table view of prior submissions organized by month, year, and review status.
- Features quick-filtering and search capabilities to audit past records instantly.
- Enables one-click document downloads for compliance archiving and tracking.

Page Overview: Centralized Admin Dashboard

Management Console Page

- Acts as the master control panel for quality managers and IT administrators.
- Allows rapid review, approval, or rejection of pending supplier change declarations.
- Includes tools for vendor record management and Excel data exports.

System Infrastructure & Deployment Needs

Resource	Purpose / Specification
Server	Host the core web application runtime environment.
Domain / Subdomain	Provide secure, accessible web portal entry for users.
Database	Store application state, supplier records, and audit logs.
SSL Certificate	Secure all web traffic and user credentials via HTTPS.
Email Service	Enable automated 2-step verification OTP, password recovery, and notifications.
